We have received your valuable suggestions! These tips are very important for the development of our EasyTech! We hope that in the future you will be able to continue to give us more valuable advice! Our company EasyTech is a company that has been operating for 6 years. With player support, EasyTech is So good. The glory of the generals, the World Champion, the European War, we believe that these games have brought joy to our players! In the future, we will continue to issue more new games, we hope to be able to receive a lot of support from you! I started playing Easytech about 3 years ago, when I endured the glory of the generals. I played most of the series and I really enjoyed the EW6, wc4 and the glory of the generals. WC4 is certainly the most PTW game they have because a terrorist war is basically impossible without 5-6 maxed land generals and at least one maxed navy general who can't be bought with medals just from campaigns. The biggest thing about this game compared to any Easytech game before, is that my rabbits are not completely ruthless and broken. I still spam a lot of cheap units sometimes, but when I send them money they actually use it unlike any other Easytech game before. I also really enjoy the way you can upgrade the cities and areas around them. Certainly more freedom and choice than previous games. But for me, the thing that stands out is that AI is mostly corrected. This game is one of the best strategic games out there for mobile. The new unit system provides a much more strategy in how much you want to invest, and ultimately how efficiently you want the unit to be. The new system gets rid of the problem of killing your generals, or you can wait in a place where they can recover. Compared to older EasyTech games, there are not as many horses as before, but this is unified both with a difficult but rewarding campaign and better quality gameplay maps and missions that you have. Updates are still being released. Personally, getting the currency that is needed for the generals was easier for me this game (you can also resist missions later to get delayed medals). In general, my favorite game EasyTech. I hope to see more in the future! Dear Player : Thank you for supporting the Great Conqueror : Rome. We will continue to update and add new content to this great game. In one month, the 4th Conquest way will come! We'll try everything to give our players the best experience of the game!
